

Regional SEO Override — Change Log

SEO Implementation Overview

To anchor Capital Motor Cars' page authority in the **New Jersey (NJ)** and **New York (NY)** tri-state area while capturing high-intent affordability-focused search traffic, a targeted Technical and On-Page SEO override was executed across the Auto Financing and Services landing pages.

Strategy Summary

- **H1 Geo-Shift:** Moved from a generic title-tag copy pasted into the H1 to a clean, geo-specific "Auto Financing in New Jersey" — the single strongest on-page local SEO signal.
- **"Low Monthly" Hook:** Injected "low monthly car payments" into the hero sub-headline and a high-visibility benefit card heading to target price-sensitive consideration-phase users.
- **NJ/NY Synergy:** Primary H1 anchors NJ (core market); meta titles, schema, and keywords explicitly include both states to retain the NYC/NY metro audience.
- **Schema Expansion:** `areaServed` in both `organizationSchema` and `createServiceSchema` expanded from NJ-only to an NJ + NY array for dual-state local map pack eligibility.
